1130a. - 1p - Returned repaired fuser. Installed and tested, printer would not work. Took fuser partially apart to detect and jammed pieces (there was a new noise it was making). All pieces looked to be in good working order. Took other fuser from upstairs Sharp and installed in downstairs machine: result was that downstairs machine still making noise. At that time, spoke with Mike about retiring machines, then discussed with Colin via phone.
