Updated router's firmware. Reviewed router logs for obvious errors/problems. Scanned wireless networks and determined additional wireless router to be in use in the building. Mapped it out to third floor, likely room 301, 302 or 303. SSID of new router: Fiddlybits. Additionally, spoke with Rich briefly to gather additional information about wireless issue(s). It is my opinion that if the removal of the Fiddlybits router does not resolve the problem for the tenant in 303 an inexpensive wireless adaptor should be purchased for use by tenant in 303 as a replacement for his current wireless adaptor.
