3p - 4p - Contacted by Carolyn. Scanned docs from the day before were not opening. Remotely connected to server and called Eaglesoft. Some documents scanned that day were in patient folders, others not. Eaglesoft rep asked about any errors when scanning. Anna showed the picture of the error 503: unable to zip. Eaglesoft rep replied that the error indicated that scans which gave that error would not be on the server or in patients files in smartdoc. Rep. advised that office should call Eaglesoft, or me, whenever any error comes up. Especially not to shred documents when an error shows up during scan/import.

Subtotal: \$ 100.00
