In order to make the EmanuelSinai.org website more accessible to those with disabilities I would make the following changes:

Add appropriate ARIA tags  
Setup keyboard navigation for menus  
A visual outline to focusable elements for keyboard only navigation  
Hide icons from screen readers (can affect reading of text)

This would bring the website largely in accordance with the guidelines set by WCAG 2.0.

Subtotal: \$ 300.00
