› New Server Setup: remote	3	\$ 125.00	No Tax	\$ 375.00
----------------------------	---	-----------	--------	-----------

Have server shipped here so that I can remove bloatware, install AV, setup user accounts, shares and most importantly: Access the current server remotely and copy all the data, so upon physical arrival it is 99%+ matching the current server's data files.

I estimate that this will take 2 hours, but could take up to 4, especially if I encounter issues with copying the data from the old server.

› New Server Setup: On Site	7	\$ 125.00	No Tax	\$ 875.00
-----------------------------	---	-----------	--------	-----------

Estimate 6 - 8 hours

Bring prepared server to office. Copy last of old server data (any small changes from sync to present). Setup server. Going to each workstation, setup new data share connections, quickbooks. Activate Quickbooks and ACT on new server.
