Description	Time/Quantity	Rate (USD)	Tax	Total
› Server Upgrade	10	$ 100.00	No Tax	$ 1,000.00

We are currently running an outdated version of Windows server as the primary server. This estimate is a 'best-guess' at the cost to setup a new Windows Server virtual machine on the overarching 'server'. Please keep in mind that the overarching server is a virtual machine server, running the Keri Doors server and the outdated Windows server, referred to as ISPNSERVER.

I would setup the newer Windows server, move all of the data (and shared folders) to it, decommission the old server and finally go to each computer in the building to point them to the new server. This is a time-consuming, but unfortunately necessary upgrade. It can be sped up by having access to all of the computers in the building at the time of the upgrade, as well as a list of all logins/passwords. Ten hours is a reasonable estimate, though it could be +/- 3 hours or so.

Subtotal:	$ 1,000.00
Total:	$ 1,000.00
